RE: APPROVAL of 1000, 1250, and 1500 gallon Two Compartment Polyethylene Septic Tanks for use in Wyoming.

Dear Ms. O'Hara:

The Water Quality Division (WQD) of the Wyoming Department of Environmental Quality (DEQ) has received and reviewed the specifications for your 1000, 1250, and 1500 gallon two compartment polyethylene septic tanks. The WQD finds that these septic tank designs meet the minimum requirements as identified in Chapter 11, Section 39 of the Water Quality Rules and Regulations, except for one condition which must be imposed. Subsequently, these products will be placed on our list of approved septic tanks for use in Wyoming with the following condition:

"The manways on the septic tanks (one on each compartment) must be extended to the ground surface because there are no clean-outs provided on the Norwesco septic tanks."

Sincerely;

Ronald L. Ewald
Engineering Evaluator
SE District, Water Quality Division
